(54) Title: **METHOD AND APPARATUS FOR PROGRAMMING UPDATES FROM A NETWORK UNIT TO A MOBILE DEVICE**(57) **Abstract:** The invention relates to transmitting a firmware of a mobile device from a network unit to be accessible for the mobile device and to be programmed in the mobile device. According to the invention, the firmware of a mobile device belonging to a network is updated so that first the update data is transmitted from a unit of the network (107), in which unit the update data is stored, by means of the mobile device (101) to be stored in an external memory unit (106) of the mobile device. The stored update data is programmed in the permanent memory unit (102) of the mobile device according to the programming logics provided therein.
